**Amdt date August 3, 2006**

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1-14 (Cancelled)

15. (NEW) A film guide for a movie camera having an image window which is arranged in the recording beam path of the movie camera and having a spacing window which is arranged on a gripper platform, between whose mutually facing film planes a film channel or film gap is formed through which the movie film is moved by means of a film transport mechanism, wherein the gripper platform or the spacing window is supported on the image window.

16. (NEW) A film guide for a movie camera having an image window which is arranged in the recording beam path of the movie camera and having a spacing window which is arranged on a gripper platform, between whose mutually facing film planes a film channel or film gap is formed through which the movie film is moved by means of a film transport mechanism, wherein the gripper platform and the spacing window are supported on the image window.

17. (NEW) The film guide of claim 15 or 16, wherein the gripper platform and/or the spacing window are/is supported on at least one contact surface of the image window via a plurality of projections which are in the form of spacers.

18. (NEW) The film guide of claim 17, wherein the projections are corner points of a geometric figure.

19. (NEW) The film guide of claim 17, wherein the gripper platform and/or the spacing window are/is supported on the at least one contact surface of the image window via three projections.

**Docket No.: 58074/M521**  
**Amdt date August 3, 2006**

20. (NEW) The film guide of claim 19, wherein the first and second projections on the gripper platform and/or on the spacing window are arranged on a side edge of the gripper platform and/or of the spacing window which run/runs parallel to the movement direction of the movie film, and the third projection is arranged on the opposite side edge of the gripper platform and/or of the spacing window, preferably centrally between the first and second projections.
21. (NEW) The film guide of claim 17, wherein the gripper platform and/or the spacing window are/is supported on the at least one contact surface of the image window via in each case one projection, which is preferably in the form of a web or is flat.
22. (NEW) The film guide of claim 17, wherein the gripper platform and/or the spacing window are/is supported on the at least one contact surface of the image window via in each case at least two projections, which are arranged on each side of the gripper platform and/or of the spacing window.
23. (NEW) The film guide of claim 15, wherein the projections are supported on the film plane of the image window.
24. (NEW) The film guide of claim 15, wherein the spacing window is sprung with respect to the gripper platform which holds the spacing window.
25. (NEW) The film guide of claim 15, characterized in that the spacing window is sprung via a contact-pressure lever.
26. (NEW) The film guide of claim 15, wherein the gripper platform is part of a drive module which contains the film transport mechanism.
27. (NEW) The film guide of claim 15, wherein the drive module is arranged in the camera housing such that it is pivotable and/or movable.

**Docket No.: 58074/M521**  
**Amdt date August 3, 2006**

28. (NEW) The film guide of claim 15, wherein the drive module is movable and/or pivotable with respect to the image window in order to insert a movie film into the film channel which is formed between the image window and the gripper platform.
